

Oil-/Gas-fired hot water heating boiler
for modulating boiler water temperatures
Rated input: 83 to 300 MBH

VIESSMANN

VITOLA 200

*Low temperature hot water heating boiler
with biferral sandwiched heat exchanger
surface*

VITOLA 200

Oil-/Gas-fired hot water heating boiler for modulating boiler water temperatures without low limit with biferral sandwiched heat exchanger surface of cast iron and steel
 Rated input: 83 to 300 MBH

High quality and performance. The double-wall, sandwiched heat exchanger surface of the Vitola 200 represents a milestone in the history of modern heating technology. The Vitola 200 combines user comfort and convenience with economy – it even switches off completely when no heat is required.

Biferral sandwiched heat exchanger surface

Vitola 200 boiler with Viessmann burner

The benefits at a glance:

- **Biferral heat exchanger surface** of cast iron and steel for high operational reliability and a long service life.
- **Clean combustion** and clean burnout of the flame through optimized combustion chamber geometry. Combustion chamber made of stainless steel. Flue gas temperature adjustable for oversized chimneys.
- Meets the specifications of the German “Blue Angel” environmental certificate and Swiss clean air regulations.
- Extremely economical and environmentally friendly due to modulating boiler water temperatures; the boiler switches off completely when no heat is required. **AFUE up to 87%.**
- Reliable heat transfer due to **wide water walls and large water content.**
- All Viessmann burners are factory tested at operating temperature and matched to the rated boiler input, facilitating adjustments and faster start-up on site.

Vitotronic – the new generation of controls: intelligent, easy to install, operate and service

Burner may not be exactly as illustrated.
